Project Title: Innovative Large-Scale Production of Affordable Clean Burning Solid Biofuel and Water in Southern Africa: transforming bush encroachment from a problem into a secure and sustainable energy source.

BITRI is one of the implementing partners in EU Horizon 2020 funded “Steambio Africa”. The project seeks to rehabilitate bush encroached rangelands through controlled harvesting (thinning) and subsequently monetizing the thinned woody biomass by turning it into a clean-burning, high-value solid biofuel. The project will demonstrate the value of an innovative superheated steam (SHS) processing technology to capture the value of encroaching woody biomass species to produce clean burning solid biofuel.

Under this project, Botswana Institute for Technology Research and Innovation (BITRI) seeks reliable and experienced Tipper trucks with load volumes of 40-50m³ to transport logs of Mongana and Mogonono from Inalegolo to Otjiwarongo in Namibia.

SPECIFICATIONS

Departure Location: Inalegolo, Kgalagadi district, Botswana

Type of Contract: Individual Contract

Languages Required: English and Setswana

Transportation Details:

Load Type: Logs (Mongana and Mogonono)

Log Diameter: Less than 18cm

Log Length: 50cm

Destination: Otjiwarongo, Namibia

Total Load: 200 tonnes

Contact Nnyaladzi Batisani for further details: nnyaladzi.batisani@gmail.com

Cellphone: **71904463**

Thank you.
